FLE TRIBE

BONUS COURSE · AI IN FRONTEND WITH CLAUDE · FRIDAY · ASSIGNMENT BRIEF

Prototype → real component

Use Claude at claude.ai to prototype a UI, then build it yourself in React.

Due: Friday, 23:59 **Submit:** GitHub repo + prompt log + reflection

Done when

- [ ] Prompt Claude to create a dashboard-widget prototype as an Artifact (HTML + Tailwind)
- [ ] Rebuild it yourself as React components with hooks; no copy-pasting the whole thing
- [ ] Submit your prompt log (all prompts, in order)
- [ ] A short reflection: 3 things Claude got right, 2 it got wrong, how you caught them

How to submit

GitHub repo + prompt log + reflection, by 23:59 on Friday. Submit it in the app on this week's Friday page: paste the link to your work and add notes for your reviewer (what you built, one thing that broke, and how you fixed it).

Complete the task **independently**. You may research and ask questions, but the work must be your own.

How it's reviewed

- **Works**: it does what the brief asks.
- **Clean**: readable, well named, no dead code.
- **Understood**: you can explain every line.
- **Shipped**: submitted on time, with a short README.

Be ready to discuss on Saturday

- Share your best prompt and your worst prompt.
- Where did AI save you time? Where did it cost you time?
- Agree on group rules for using AI in assignments.
