FLE TRIBE

BONUS COURSE · AI IN FRONTEND WITH CLAUDE · TUESDAY · LESSON GUIDE

Claude as a tutor

This course: Use Claude in the browser at claude.ai as a tutor, pair programmer and prototyping tool, while keeping your own skills sharp.

Ask for teaching, not answers

The most useful prompt for a learner is one that makes Claude a tutor:

```
I'm learning React. Don't give me the solution.
Give me one hint at a time to fix this, and ask me
questions to check I understand.

[paste your code and the error]
```

Prompts that work well

- "Explain this code line by line for a beginner."
- "Explain closures with an everyday analogy, then a short code example."
- "Quiz me with 5 questions on this week's topic, one at a time."
- "What's the difference between X and Y, and when would I use each?"

Make it your own tutor prompt

Write a short prompt you reuse every day: your level, the course topic, how you like explanations (short, with examples), and that it should give hints before answers. Save it in your notes.

Research questions

Answer these in the app, in your own words, to unlock the next lesson.

1. Have Claude quiz you on this week's topic. Score yourself.
2. Write a reusable "tutor" prompt for this course.
