FLE TRIBE

BONUS COURSE · TYPESCRIPT · FRIDAY · ASSIGNMENT BRIEF

Weather app in TypeScript

Convert your Week 09 weather app to TypeScript.

Due: Friday, 23:59 **Submit:** GitHub repo + live URL

Done when

- [ ] Strict mode on, zero `any`
- [ ] Interfaces for the API response and your app state
- [ ] Builds with an npm script (`npm run build`)
- [ ] README explains one bug TypeScript caught

How to submit

GitHub repo + live URL, by 23:59 on Friday. Submit it in the app on this week's Friday page: paste the link to your work and add notes for your reviewer (what you built, one thing that broke, and how you fixed it).

Complete the task **independently**. You may research and ask questions, but the work must be your own.

How it's reviewed

- **Works**: it does what the brief asks.
- **Clean**: readable, well named, no dead code.
- **Understood**: you can explain every line.
- **Shipped**: submitted on time, with a short README.

Be ready to discuss on Saturday

- Show one bug TypeScript caught for you.
- Which type was hardest to write?
- Is TypeScript worth the extra typing? Argue both sides.
