FLE TRIBE

WEEK 00 · FRIDAY · ASSIGNMENT BRIEF

My Path map

Write a one-to-two page document that shows you understand the journey you are starting.

Due: Friday, 23:59 **Submit:** A shared Google Doc link

Done when

- [ ] Analyse 3 junior frontend job ads: role, company type, required skills
- [ ] Sort these 12 tasks into Frontend / Not frontend / Gray area, with one sentence of reasoning each: build a login form, design the users table, fix a button that overlaps on mobile, configure a cloud server, make a page load faster, write an API endpoint, add keyboard navigation, train a recommendation model, turn a Figma design into a page, set up CI/CD, add dark mode, call a weather API and show the result
- [ ] Your 5-month personal goal in 3 sentences

How to submit

A shared Google Doc link, by 23:59 on Friday. Submit it in the app on this week's Friday page: paste the link to your work and add notes for your reviewer (what you built, one thing that broke, and how you fixed it).

Complete the task **independently**. You may research and ask questions, but the work must be your own.

How it's reviewed

- **Works**: it does what the brief asks.
- **Clean**: readable, well named, no dead code.
- **Understood**: you can explain every line.
- **Shipped**: submitted on time, with a short README.

Be ready to discuss on Saturday

- Which role surprised you the most, and why?
- Share your sort of the 12 tasks. Where did the group disagree?
- What does a typical day for a junior frontend developer look like?
