FLE TRIBE

WEEK 13 · FRIDAY · ASSIGNMENT BRIEF

Task manager, part 1

Build a single-page task manager in React + Bootstrap.

Due: Friday, 23:59 **Submit:** GitHub repo link

Done when

- [ ] Add tasks with a validated form: title required, due date not in the past, priority
- [ ] Tasks shared through Context
- [ ] Saved with a `useLocalStorage` custom hook
- [ ] Filter by status: all, active, done

How to submit

GitHub repo link, by 23:59 on Friday. Submit it in the app on this week's Friday page: paste the link to your work and add notes for your reviewer (what you built, one thing that broke, and how you fixed it).

Complete the task **independently**. You may research and ask questions, but the work must be your own.

How it's reviewed

- **Works**: it does what the brief asks.
- **Clean**: readable, well named, no dead code.
- **Understood**: you can explain every line.
- **Shipped**: submitted on time, with a short README.

Be ready to discuss on Saturday

- Demo adding and completing a task.
- Why did you put state where you did?
- Show your custom hook and explain it.
