FLE TRIBE

WEEK 14 · FRIDAY · ASSIGNMENT BRIEF

Task manager, part 2: pages

Turn your task manager into a multi-page app.

Due: Friday, 23:59 **Submit:** GitHub repo link

Done when

- [ ] Routes: task list, task detail (`/tasks/:id`), new task, 404
- [ ] A shared layout with navigation that shows the active page
- [ ] Detail page reads the task id from the URL
- [ ] One page lazy loaded

How to submit

GitHub repo link, by 23:59 on Friday. Submit it in the app on this week's Friday page: paste the link to your work and add notes for your reviewer (what you built, one thing that broke, and how you fixed it).

Complete the task **independently**. You may research and ask questions, but the work must be your own.

How it's reviewed

- **Works**: it does what the brief asks.
- **Clean**: readable, well named, no dead code.
- **Understood**: you can explain every line.
- **Shipped**: submitted on time, with a short README.

Be ready to discuss on Saturday

- Demo creating, viewing and completing a task.
- Why did you put state where you did?
- Show one validation message and how it is triggered.
