FLE TRIBE

WEEK 15 · FRIDAY · ASSIGNMENT BRIEF

Book finder

Build a book search app on the Open Library API with React + Bootstrap.

Due: Friday, 23:59 **Submit:** GitHub repo link

Done when

- [ ] Debounced search box (no request per keystroke)
- [ ] Clear loading, error, empty and results states
- [ ] Book detail route with cover image
- [ ] Favourites saved with a custom hook, on a protected favourites page

How to submit

GitHub repo link, by 23:59 on Friday. Submit it in the app on this week's Friday page: paste the link to your work and add notes for your reviewer (what you built, one thing that broke, and how you fixed it).

Complete the task **independently**. You may research and ask questions, but the work must be your own.

How it's reviewed

- **Works**: it does what the brief asks.
- **Clean**: readable, well named, no dead code.
- **Understood**: you can explain every line.
- **Shipped**: submitted on time, with a short README.

Be ready to discuss on Saturday

- Type fast in your search box with DevTools open. How many requests fire?
- How do you handle an API error?
- Plain effects vs TanStack Query: when do you use each?
