WEEK 17 · THURSDAY · LESSON GUIDE

Progress check: get feedback early

This week: Plan an original React app and build its core feature.

Show it early

Push your unfinished app and share the Vercel preview link. Early feedback costs nothing; late feedback costs days.

A 10-minute test

- Give someone one task: "Find an event this weekend and save it."
- Don't help or explain. Watch and take notes.
- Write down every place they hesitate or get stuck.

Re-plan

List what's left. Cut anything that isn't needed for your core feature. A finished small app beats an unfinished big one.

Research questions

Answer these in the app, in your own words, to unlock the next lesson.

1. What did your testers find that you missed?
2. What will you cut to finish on time?
