FLE TRIBE

WEEK 18 · TUESDAY · LESSON GUIDE

# README & final deploy

**This week:** Finish, polish and present your capstone.

## Write a README

- One sentence on what the app does and who it's for.
- A screenshot or two, and the live link.
- How to run it locally: `npm install`, then `npm run dev`.
- A short "what I learned" section.

## Final deploy on Vercel

Push your final changes to `main`. Vercel deploys automatically, exactly as in Week 16. Open the live link on your phone and click through every page before you submit.

### Research questions

Answer these in the app, in your own words, to unlock the next lesson.

1. Read your README as a recruiter would. What's missing?
2. Does your live site match your README?

## Start your research here

- GitHub: about READMEs: https://docs.github.com/en/repositories/managing-your-repositorys-settings-and-features/customizing-your-repository/about-readmes
