FLE TRIBE

WEEK 19 · THURSDAY · LESSON GUIDE

Interview prep

This week: Get ready for your first frontend job: portfolio, GitHub, CV, applications and interviews.

Common junior interview questions

- What's the difference between `let`, `const` and `var`?
- Explain the CSS box model.
- What happens when you type a URL and press Enter?
- What are props and state in React?
- When does `useEffect` run?
- How do you make a page accessible?
- Walk me through a project you built and one bug you fixed.

Talking about your projects

Use a simple structure: the problem, what you built, one challenge and how you solved it, and what you'd do next. Keep it under 2 minutes and practise it out loud.

Live coding

- Think out loud: interviewers want to hear how you reason.
- Ask questions before you start coding.
- Start simple, then improve.
- If you're stuck, say what you'd try next.

Research questions

Answer these in the app, in your own words, to unlock the next lesson.

1. Answer 10 common junior interview questions out loud.
2. Practise explaining your capstone in 2 minutes.
