FLE TRIBE

WEEK 19 · WEDNESDAY · LESSON GUIDE

Finding & applying for jobs

This week: Get ready for your first frontend job: portfolio, GitHub, CV, applications and interviews.

Where to look

- Job boards and LinkedIn: search "junior frontend", "React developer", "frontend intern".
- Company career pages of products you use.
- Tech communities, meetups and Twitter/X: many roles are shared there first.

Reading a job ad

Split requirements into must-haves (usually HTML, CSS, JavaScript, React, Git) and nice-to-haves. If you meet most must-haves, apply.

Apply well

- Tailor your first two lines to the company: what they build and why you care.
- Link your portfolio and the most relevant project.
- Keep a simple tracker: company, role, date, link, status.
- Follow up politely after a week if you hear nothing.

Research questions

Answer these in the app, in your own words, to unlock the next lesson.

1. Find 3 roles that match your skills. What do they have in common?
2. Write a short message to a hiring manager.
