FLE TRIBE

WEEK 04 · FRIDAY · ASSIGNMENT BRIEF

Make your profile page responsive

Lay out your profile page with Flexbox and Grid so it works on phones and laptops.

Due: Friday, 23:59 **Submit:** A shared link (CodePen, Google Drive or GitHub)

Done when

- [ ] Flexbox for the navigation, Grid for a skills or projects section
- [ ] Works at 375px (phone) and 1280px (laptop) with no sideways scrolling
- [ ] At least one media query, written mobile-first
- [ ] Images never overflow their containers

How to submit

A shared link (CodePen, Google Drive or GitHub), by 23:59 on Friday. Submit it in the app on this week's Friday page: paste the link to your work and add notes for your reviewer (what you built, one thing that broke, and how you fixed it).

Complete the task **independently**. You may research and ask questions, but the work must be your own.

How it's reviewed

- **Works**: it does what the brief asks.
- **Clean**: readable, well named, no dead code.
- **Understood**: you can explain every line.
- **Shipped**: submitted on time, with a short README.

Be ready to discuss on Saturday

- Show your page at phone and laptop width.
- Which CSS bug took you the longest?
- Flexbox or Grid: which did you reach for, and why?
